**DETAILED ACTION*****Drawings***

1. The drawings are objected to because in fig. 2, a duplicate reference number is placed at the bottom of the figure. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2856

Re to claims 1 and 4, as depicted in figs. 2 and 3, Semrau discloses a signal input for receiving the vehicle speed. Semrau discloses a scaling indicator for indicating a selected one of a set of predetermined scalings (col. 4, lines 37-40). Semrau discloses a pointer (18), and a dial face having magnitude indicia.

Re to claims 2 and 5, Semrau discloses a button (34) for selecting one of a set of predetermined scalings.

Re to claims 3 and 6, as depicted in fig. 1, Semrau discloses the predetermined scaling comprises MPH and km/h.
